

CATALINA ISLAND TRIP

SEPTEMBER 24-28, 2018

7TH GRADE

Cost: \$860.00 due by Friday, September 14

For more information, please contact Mrs. Roxanne Hunker at rhunker@rhoadesschool.com. There will be an important Catalina Island Trip meeting after the Middle School Back to School Night on **Wednesday, September 12** in the Science Lab.

Trip Overview:

Get ready to explore Catalina Island's beauty both on land and underwater. This fun filled program gives students an overview experience of the diversity of the island both on land and in the ocean. Students will get a chance to snorkel, kayak (day and night) and hike the island.

The Catalina Island Marine Institute (CIMI) will enrich and inspire students through a variety of experiential marine science labs and field activities, with a focus on Science, Technology, Engineering, and Math (STEM). The Catalina Island Marine Institute enhances the marine biology units studied at Rhoades. The Catalina Island Marine Institute will provide learning opportunities that are simply not possible in a traditional classroom at three different facilities on Catalina Island: Toyon Bay, Fox Landing, and Cherry Cove.
