

### Language & Literacy

We encourage communication and vocabulary development by creating a literacy-rich environment that introduces children to a wide range of stories, letters and words.

### Social-Emotional

Children discover how to respect the feelings of others, while learning how they fit into the larger world using problem-solving activities to reinforce character education.

### Creative Expression

Children create sounds, explore textures and discover music and art in various ways. Through music, art and imaginative play, they learn self-expression and creative thinking.

### Citizens of the World

We integrate Spanish throughout the day to give children a head start on mastering a second language. In addition, we focus on awareness of diverse cultures and traditions around the globe.

### Mathematics

Hands-on experiences with basic math concepts help children learn the foundation of addition and subtraction, and different ways to compare quantities.

### Wellness

Children develop mobility, balance and fine motor skills through dance, games and physical activities. Basic nutritional concepts are introduced to help them make healthy choices.

### Science & Social Studies

Different types of families and community helpers are introduced as children explore geography and culture, and create fun science experiments. Children also share their own family experiences.

### Digital Interactions

Children learn about different uses for technology and how they have changed over time. We also review terminology and provide opportunities for students to use technology to express themselves creatively.
